

JSX & Lists

Everything is JavaScript! Use JavaScript Tools!

```
{ name: 'Max', age: 28, id: 1 }
```

```
{ name: 'Manu', age: 29, id: 2 }
```

`map()` array into different array

Can be rendered
to screen!

```
<Person name={person.name} key={person.id} />
```

```
<Person name={person.name} key={person.id} />
```

Allows React to efficiently re-render the list.
